

Our **Carpentry Instructor program (MIC)** has started with the first training module on 15th August. In this first program module we welcomed 5 female and 12 male candidates with a working background as self-entrepreneurs, as company employees and as TVET trainers

Our trainees revised and reflected on their competence in using and applying safety measures when handling carpentry tools and machinery. In the competence assessment (oral exam, integrated situation and practice assessment) the participants showed their competence applying competent use of carpentry tools and machines. The training has been conducted in a hybrid format by an international team with instructors from Rubengera Technical Campus and the German federal training centre BuBiZa. The next two program modules “Technical Education & Coaching” and “Workplanning” will take place from 05.09- 16.09.2022 at Rubengera Technical Campus (RTC)

We are very pleased to announce the start of the **CNC Operator Program** (200 training hours in 6 modules). This professional training program prepares carpenters and carpentry trainers to acquire a Certificate of Competence for CAD & CNC Operation and the participation in an international assessment. Further information on the format in the attached training program Info- Flyer!

A team of technicians from our academic cooperation partner THM, (German University of Applied Studies) will visit IPRC Kitabi and intensify its cooperation by end of September. This visit and joint workshop aims at preparing an integrated project in 2023 within the RTQF Level 7 training in Wood-Technology.

New CNC Operator Program starts
19th September 2022.
Application deadline:
14th September 2022

Professional training program offer

Certificate of Competence for CAD & CNC Operation

Duration: 6 weeks (240 hrs.) from September 2022 - March 2022

Location: Rubengera Technical Campus (RTC)

Registration: until 14.09.2022

Training program description

This professional training program for carpenters and carpentry trainers is an international certified program including an international assessment. It aims to qualify the participants as professional CAD & CNC-Operators. The participants will receive a certificate of competence (national education partners) as well as a certificate as CAD & CNC-Operator in Carpentry (international education partners). Training participants will be able to produce technical CAD Drawings in AutoCAD Software, transfer CAD drawings into CNC CAM Software and generate programs for CNC-Production. Operation of 3-Axis a CNC-Machine are trained by working on practical projects. Trainees will be provided with access to AutoCAD & CAM Software during the time of their training. The final assessment workshop includes for each participant briefing and preparation. The program will start on 19.09.2022 (1 week) with the basic module: CAD-Basics including assessment. The number of participants is limited to 15.

Training program schedule

| | |
|------------------|------------------------------------|
| Until 14.09.2022 | Registration |
| 19.- 23.09.2022 | Module CADB= CAD Basics |
| 25.- 29.10.2022 | Module CADA= CAD Advanced |
| 30.- 05.11 .2022 | Module CADT= CAD Technical Drawing |
| 05.- 09.12.2022 | Module CAM= CNC Programming |
| 12.- 16.12.2022 | Module CNC= CNC Operation |
| To be determined | International Assessment |

Final competence assessment

The program competence assessment consists of 5 parts:

1= CAD Technical Drawing [4h]; 2= CAD CAM Drawing [1,5h]; 3= CNC Programming [1,5h];
 4= CNC Operation [0,5h]; 5= Technical Interview [0,5h]

The assessment committee consists of an international team of technicians and experts from the partnering institutions with a professional background in applied pedagogy, joinery and carpentry. Program assessment admission requirement: All modules of the CAD & CNC Operation program (see program schedule above) have been successfully completed.

Tel: 0781701402

Training program admission requirements (to be proved by the applicant with respective documents during registration)

1. Secondary school degree in carpentry/joinery and 2 years of working experience in the professional field of carpentry/joinery **or** at least the evidence of 5 years of experience in the professional field of carpentry/joinery or carpentry/joinery training
2. Advanced ICT Skills , MS office and access to an ICT working place
3. Written and spoken competence in English language
4. Successful performance in the CAD Basics module (basic module)
5. CAD drawing competence is an advantage but not a mandatory competence

Training program costs

The overall training costs including the provision of competent national and international trainers, training facilities as well as catering and accommodation for all participants during the training at the training facilities in Rubengera will be covered by the proWOOD program. Applicants are supposed to pay a registration fee of 10.000 RWF to confirm their registration for the training program participation. A second fee of 10.000RWF is required to be admitted to the final international assessment.

Training program provision & accreditation

The training is organized by proWOOD. ProWOOD is a Partner Africa Project between the Internationaler Bund e.V. (IB) supported by the German Ministry for Economic Cooperation and Development via Sequa (Germany). ProWOOD has been established to improve together with its partners training and promotion of the wood sector in Rwanda, especially in the western province. The Rwanda Wood Value Chain Association, IPRC Kitabi and Rubengera TVET are partners in the implementation of training activities. International accreditation partners from Germany for the training program are the Federal Training Center for Carpentry BuBiZa and Company FingerHaus GmbH.
